DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claim 18 is withdrawn based on the rejections provided below.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 18 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In particular, claim 18 is drawn to a process. Under 35 U.S.C. §101 a process must 1) be tied to a particular machine or apparatus or 2) transform underlying subject matter such as an article to a different state or thing.

In regards to condition 1, the claimed process steps are not tied to any particular machine or apparatus, and as such can be performed by hand or as mental steps. To qualify as a 35 U.S.C. § 101 statutory process under condition 1, the claim should positively recite the other statutory class (apparatus or thing) to which it is tied, for example by identifying the apparatus that accomplishes the method steps. In regards to condition 2, the claimed process steps do not transform underlying subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3769

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In regards to claim 18, it is unclear if the trigger and the trigger value are the same. It is also unclear if the step of "activating an alert" is the same step or different step then "generating a trigger". Additionally, the preamble is unclear because the body of the claim incorporates steps beyond the detection of an event. In other words "updating the trigger" occurs after "the method of detecting of an event".
